Art Unit:

***Claim Rejection under 35 U.S.C. 103(a)***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5, 7-9, 14, 16-18, 20, 21, 23, 24, 26, 27 are rejected under 35 U.S.C. 103(a) as being unpatentable over DasGupta et al (US 5,658,947; 8/19/97) and Dijkstra et al (CA 2097997; 12/9/94) in combination.

DasGupta teaches a method of applying betulinic acid to skin for the treatment of melanoma. See abstract, claims. DasGupta does not teach the method comprising vitamin D analogs. However, Dijkstra teaches a method of applying vitamin D analogs to skin for the treatment of melanoma. See abstract. In the absence of unexpected results, it would have been obvious to one having ordinary skill in the art to combine the methods. One would have been motivated to do this since both methods individually teach the treatment of melanoma.

***Claim Objection***

Claims 6, 10-13, 15, 19, 22, 25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
